### A Strategy Game where you Build and Rule an Empire during the Rise of Islam!

In Arabian Lords, YOU are an enterprising merchant lord during the Rise of Islam. Start with one palace and expand to rule an ancient empire. Yet time is of essence for the Mongol hordes are coming . . . and they threaten the very existence of the Muslim world.

- Campaign includes 11 scenarios spanning the rise of Islam during the 7th - 13th centuries.
- Stunning graphics and real-time action let you craft and manage your own Middle Eastern city.
- Hire workers, build and upgrade markets, and keep your customers happy and secure.
- Competitive LAN and Internet multiplayer allows you to match wits with up to 4 players.

On this page you can find the answers to your most frequently asked questions by accessing one of the different topics from the list below. The newest questions are listed in White. Make sure you also check out the [Arabian Lords User Guide](#) for more detailed game information.

#### What is Arabian Lords?

Arabian Lords is a real-time strategy game (RTS) where you attempt to build a merchant empire.

#### How will Arabian Lords differ from other RTSs?

Arabian Lords will differ from other RTSs in many ways. Players will be able to complete quests and experience the world at their own pace, whether it be a few hours here and there or entire weeks at a time. Additionally, our quest system will provide an enormous variety of captivating quests with story elements, dynamic events, and flexible reward systems.

#### How will the game be distributed or sold?

Gamers will be able to purchase Arabian Lords through retail outlets, online sites, or directly from BreakAway, Ltd.

#### Will Arabian Lords be playable on a Mac and are people currently testing it on Macs?

Arabian Lords is a PC-ONLY product, and there are no plans to create a Mac version.

● Description (include exact error message)

Whenever I start-up Arabian Lords, the intro movie runs really choppy. I hit the "esc" key to bypass the movie and get to the main menu. Then, I click on multiplayer, and the game crashes. Why does this happen?

Thanks,

John Doe
